

**CONGRATULATIONS ON THE PURCHASE OF YOUR NEW ACN DIGITALTALK® EXPRESS PHONE SYSTEM!**

Before you begin the installation process, please confirm you have the following:

1. An active Internet connection
2. All devices associated with your new phone system
3. ACN **Installation Instructions** email (Required for telephone number registration and configuration (see page 2))

Once confirmed you have the items noted above, please review then follow the instructions in sequence below, beginning with **Step 1**.

It is important to note that the initial setup process and registration of your devices can take up to **1 hour**. Please ensure that you have completed the process to **charge your handset** (if applicable) prior to beginning the installation process.

**REVIEW ITEMS INCLUDED WITH YOUR PHONE SYSTEM**

Depending on the equipment ordered, you will have the following items included in your shipment:

**Wireless Base Station**  
(KX-TGP600)

**AC Adaptor for Base Station (1)**  
DC Output: 6.5 V

**Desktop Phone**  
(KX-TPA65)

## TELEPHONE NUMBER REGISTRATION & CONFIGURATION

Before proceeding with Step 2, please locate and reference the following ACN DigitalTalk® Express emails:

- Outbound Calling Activation/Network Provisioning:** Identifies the date in which **outbound** calling will be enabled and that your devices are active on the ACN network.
- Installation Instructions:** Includes a complete list of your telephone numbers and the order in which they have been activated, along with detailed installation instructions.
- Firm Order Confirmation** (only applicable if transferring phone number(s)): Identifies the date your phone number(s) will be transferred to ACN and when **inbound** calling will be enabled.
  - You may install your equipment once received. However, your phone numbers will not ring to your phone system until inbound calling is enabled on the date noted in this email.

**Emails 1 and 2 will be sent in sequence, and are required in order for you to register your handset/desktop phone(s). If for any reason you do not have either of these emails, please contact us at 877-876-8767 (U.S.) or 800-219-0143 (CA).**

### STEP 2 SETTING UP THE WIRELESS BASE STATION

Base Station

- Connect the AC adaptor to the base station.
- Plug an active Internet connection into the base station via an Ethernet cable.
- Wait 10 minutes.
- The Status LED on the base station will change multiple times from red to amber to green.
- Verify the base station Status LED is solid green.
- At this point, pairing of your handset/desktop phone to the base station can begin.

### STEP 3 PAIRING THE HANDSET/DESKTOP PHONE(S) TO THE BASE STATION

A phone number must be assigned to each handset/desktop phone. Phone numbers are assigned to the handset/desktop when paired to the base station. Pairing the handset/desktop to the base station – in the order listed in the Installation Instruction email – is necessary to ensure that each device is paired with the correct phone number.

When pairing a new handset/desktop phone:

#### 1. Base Station:

- Press and hold the handset locator button (on the right side of the base station) for about 4 seconds until the Status LED flashes red. The next step must be completed within 2 minutes.

#### 2. Handset/Desktop Phone(s):

- Press and hold **OK** until "Please Wait" is displayed on the LCD. Once complete, the handset/desktop phone will display "Registered."
- On initial pairing, the handset/desktop phone will update its firmware. This can take up to 20 minutes for each handset/desktop phone.
- You may pair additional handset/desktop phones while others are updating firmware.

- Repeat this process for each handset/desktop phone. You can register up to 8 handset/desktop phones to your base station. *Each device must have an associated phone number.*
- During updates, please do not use the devices. The screen will change display status showing "Downloading," "Erasing," and "Writing," and the device may reboot or turn off.**

- If your device has turned off, please turn it back on by pressing/holding the power button.
- You will see the **handset ID in the top left** and the **telephone number in the bottom** of the display once pairing is complete.

To change the pairing of the telephone numbers to handsets/desktop phones, please reference the document titled "How to Change Line to Device Pairings" located within the **Products & Services Support** section of [myacn.com](http://myacn.com) and [myacncanada.ca](http://myacncanada.ca).

## CONGRATULATIONS! SETUP IS COMPLETE
